## ARTICULATING TOW BARS (ATBs)

THE 21<sup>ST</sup> CENTURY OF TOWING:  
FAST, SAFE, & TERRAIN-READY

### PRODUCT OVERVIEW

The Wunderbar<sup>®</sup> Articulating Tow Bars (ATBs) from DPSG USA, Inc., revolutionize 21st-century towing by providing unparalleled speed, safety, and durability. These tow bars are specifically engineered to handle military and off-road vehicle recovery, offering reliable performance in challenging environments. Designed for ease of use, they connect vehicles on **any** terrain within seconds and stow away compactly when not in use, ensuring maximum efficiency and readiness.

### UNMATCHED BENEFITS

Wunderbar<sup>®</sup> ATBs are designed to handle even the most demanding situations. Their unique capability to connect vehicles on uneven terrain or even while parked, ensures rapid deployment under any circumstances. This is particularly vital during military operations, where speed can mean the difference between success and failure. **By enabling quick and safe towing, soldiers are free to defend downed vehicles during critical moments.**

Wunderbar<sup>®</sup> ATBs comply with the stringent AR-385-10 and STANAG 4478 standards, emphasizing safety and reliability. Their lightweight and compact design enhances portability, making them easy to transport and store. Built from specialized materials, the Wunderbar<sup>®</sup> ATBs also deliver longevity as they require no maintenance other than occasional cleaning with soap and water, or paint touch-ups, reducing upkeep costs significantly.

# KEY FEATURES FOR SUPERIOR PERFORMANCE

# WUNDERBAR®

Every aspect of the Wunderbar® ATBs is engineered for safety, speed, practicality, and reliability.

Rapid Deployment is swift and simple, requiring only one person (or a robotic controller) to operate the system within seconds.

- ▶ **High Strength, Low Weight:** These tow bars combine high strength with low weight, meeting Mil Std. 1472 specifications. All components weigh under 50 pounds, except those for heavy tanks, which are capped at 75 pounds. This ensures ease of handling without compromising durability.
- ▶ **Universal Terrain Compatibility:** Wunderbar™ ATBs boast universal terrain compatibility, featuring the largest connection zones in the industry, ranging from 50,000 to 700,000 cubic inches.
- ▶ **Road Ready:** Approved for highway speeds, they enable seamless transitions from rugged environments to paved roads.
- ▶ **Compact Storage:** When not in use, mounting kits allow the ATBs to be securely stowed out of the driver's view, preserving visibility and convenience.
- ▶ **Field Proven:** Having been successfully deployed by the U.S. Army, Canadian Army, USMC, UK, and allied forces, these tow bars have a proven track record in real-world operations across a variety of surface conditions: ice, snow, tundra, mud, shale, sand, etc.

## ▶ GLOBAL SUCCESS

Wunderbar® ATBs have been field-tested in harsh environments, including desert and combat operations, in the U.S., Canada, U.K., MENA, Africa, Scandinavia, and beyond.

## PRODUCT LINEUP

Model	Capacity	Material	NSN
DP007	7K Ultra-Light ATB	Aluminium	2540-01-658-6496
DP2000	20K Light ATB	Aluminium	4910-01-680-3097
DP3000	30K Light ATB	Steel	2540-01-690-9555
DP6500	65K Medium ATB	Steel	4910-01-655-7741
DP8000	80K Heavy Short ATB	Steel	4910-01-628-0633
DP8080C	80K Heavy Long ATB	Steel	2540-01-663-1639
DP0120	120K Heavy Long ATB	Steel	Pending
DP0180	180K Heavy Tank ATB	Steel	Pending
